

Andrés Quintero Bedoya

Site Reliability Engineer and AI Engineer

Career summary

Experienced Systems Engineer with 4+ years in AI/ML, specializing in developing scalable AI solutions using Kubernetes, Cloud Run, and cloud databases. As co-founder of Web3ForU and actively engaged in various technology communities, I lead cross-functional teams, mentor talent, and drive AI innovation, focusing on Generative AI, LLM-based applications, and real-time, low-latency solutions. Skilled in building AI platforms and automating processes to align technology with business goals while staying ahead of industry trends.

Work Experience Summary

AI Engineer (04/2024 - 03/2025) at *Itti* (Asunción, PY): Team management leading the quality and infrastructure of generative artificial intelligence applications across multiple companies within the Vásquez Group.

Site Reliability Engineer (04/2024 - 03/2025) at *Guane Emerging Technologies* (Medellín, CO): Led the optimization of Kubernetes clusters, achieving a 30% cost reduction. Developed automated CI/CD deployments and integrated monitoring tools with Slack using Prometheus and Grafana.

Generative AI Engineer (10/2023 - 04/2024) at *Guane Emerging Technologies* (Medellín, CO): Designed and developed generative artificial intelligence products for the legal and logistics sectors using frameworks such as Langchain. Processed over 10,000 legal rulings by creating a custom framework that integrates methodologies like RAG, Chain of Thought, and agents.

Data Scientist (02/2023 - present) at *Universidad de Antioquia* (Medellín, CO): Researched and prototyped an AI-based system for translating Colombian Sign Language (LSC) to Spanish. Managed the data and AI model platform for the LSC project, with an upcoming article to be published on this research.

Data Analyst (12/2021 - 08/2022) at *Experimentality Labs*: Worked on research and development projects, supported data architecture design, and contributed to Business Intelligence processes. Created ETL pipelines for data analysis and artificial intelligence product development on AWS using Terraform and Python.

Specialization in Analytics and Data Science Tutor (02/2021 - 07/2022) at *Universidad de Antioquia* (Medellín, Antioquia, Colombia): Delivered advanced classes on Neural Networks, including Convolutional, Recurrent, and Transformer architectures, both theoretically and practically.

Education

Systems Engineering (02/2021 - 07/2022) at *Universidad de Antioquía* (Medellín, Antioquia, Colombia): GPA: 4.0/5.0

Technical skills

- **Programming Languages:** Python, Golang, Terraform, JavaScript, Bash
- **Frameworks & Libraries:** TensorFlow, PyTorch, Langchain, Scikit-learn, Keras
- **Cloud Platforms:** AWS, Google Cloud Platform (GCP), Azure
- **Containerization & Orchestration:** Kubernetes, Docker, Cloud Run
- **Infrastructure as Code:** Terraform, Helm
- **Data Processing:** Pandas, NumPy, ETL pipelines
- **Machine Learning:** Statistics, Math, Generative AI, Transformers, NLP
- **Monitoring & Logging:** Prometheus, Grafana, Slack Integration, Tempo, Jaeger
- **Version Control & CI/CD:** Git, Jenkins, GitHub Actions
- **Databases:** Cloud Databases (SQL, NoSQL)

Methodologies & Architectures

- **RAG (Retrieval-Augmented Generation)** for AI systems
- **Chain of Thought** prompting and agent-based systems
- **CI/CD Pipeline Automation**
- **Data Architecture Design**

Social & Leadership Skills:

- **Team Leadership:** Mentoring cross-functional teams, scaling teams, technical leadership
- **Collaboration:** Active contributor to Google Developers Group Medellín and Cloud Native Medellín
- **Communication:** Clear translation of complex AI concepts for different stakeholders
- **Community Engagement:** Co-founder of Web3ForU, active in tech meetups and workshops
- **Teaching & Coaching:** Educating on Neural Networks, Deep Learning, Cloud Architecture
